Q3 2023

In Q3 the US economy posted good performance, whereas in the Eurozone and China the climate continued to be disappointing. In most countries, inflation continued to drop back whilst remaining too high in the opinion of central banks. The big central banks of advanced economies continued to raise key rates, but at a slower rate than in previous quarters. However, some central banks in emerging economies started to lower their rates. On the markets, bond yields rose and stocks retreated.

United States

Despite a sharp increase in interest rates, the US economy was stronger than expected. Many observers have played down or softened their recession forecasts. The causes of this good resistance were, among other factors, extensive household savings and public measures to support investment. The revisions of the figures for August and September thus confirmed GDP growth had remained strong in Q2, at an annualised rate of 2.1%. Likewise, ISM September indicators signalled robust activity in the services sector and an easing of the contraction in industry. There was a great deal of jobs creation, albeit slowing, with the unemployment rate rising slightly (3.8% in August compared to 3.6% in June). The general inflation index accelerated again (3.7% in August compared to 3.0% in June), mainly because of the hike in fuel prices, but the underlying index continued to slow to 4.3% in August compared to 4.8% in June. The Fed raised Fed Funds rates by 25 basis points in July, (supporting their range of 5.25-5.50%) but kept them unchanged in September, leaving the door open for possible additional hikes.

Eurozone

Economic activity has been disappointing in the Eurozone. Q2 growth figures were almost stagnant – a GDP rise of 0.1% – after the standstill already seen in Q1. While the countries most exposed to services (France and Spain) maintained a slightly positive pace, those in which industry is more important showed almost no growth (Germany) or negative growth (Italy). Q3 activity surveys (notably the PMI indices) showed that the deterioration already seen in industry tended to spread to services. Even so, despite some signs of a slowdown, the labour market remained robust, with the unemployment rate at 6.4% in August, its lowest level since the creation of the Eurozone. On the whole, inflation dropped back. In September the rise in the general rate over 12 months returned to 4.3% (compared to 5.5% in June), with the underlying index at 4.5% (as against 5.5%) The European Central Bank raised its key rates by 25 bps in July, then again in September, bringing the deposit rate to 4.00%. However, it stopped short of indicating that additional hikes were likely, reaffirming its confidence in the current rates level to bring inflation down further.

Emerging Markets

Q3 data from China still showed that there was weakness in the property sector, as well as in other sectors, while property developers encountered debt difficulties. However, the data released in August exceeded expectations, suggesting that the worst had already been seen in Q3. But despite forecasts of a gradual cyclical recovery, China is experiencing a secular slowdown over several years. The main factor that is the source of this slowdown has been, and continues to be, the property sector. State powers responded with a number of policy measures, although these have not been enough to kick-start growth quickly. The priority remains a long-term transition toward a less housing- and export-intensive growth model. In the majority of emerging countries macro-economic momentum remains weak although on the upside. In fact, exports appear to have reached their low point. However, due to weakening base effects, a rise in food and energy prices and pressure on foreign exchange, the process of falling inflation slowed and weighed on households' purchasing power. Yet central banks, apart from a few atypical cases (Turkey, Russia and Thailand, for example) have started and continued monetary easing by lowering their rates. However, there are many who have adopted a more cautious outlook following Fed statements and the possibility that it will keep rates high for longer. In other significant events in this quarter, the BRICS countries opened the way to admitting six new members (Argentina, Egypt, Iran, Ethiopia, Saudi Arabia and the United Arab Emirates) and India was included in the EMGBI index.

Equities

Stocks were reined in in Q3. Despite the good performance of corporate results, the hawkish tone of the central banks led to a sharp rise in long-term rates, which in turn triggered a correction in the stock markets. The US 10-year rose by almost 75 bps this quarter. The MSCI World AC dropped 2.9%. At the regional level the US (down 3.4%) underperformed Europe (down 2.5%). In the Eurozone (down 4.6%), Italy (up 0.6%) far outperformed its neighbours. The rest of the member states are in the red this quarter, with Portugal (down 6.1%) and the Netherlands (down 11.5%) bringing up the rear. Outside the Eurozone, the UK market advanced 1.3%. Sweden (down 5.1%) and Switzerland (down 3.3.%) ended the quarter in negative territory. Japan (up 0.8%) in local currency continues to benefit from the fall in the yen as well as the resilience of its economy. Finally, the MSCI Emerging Markets index was down 2.2% driven by the underperformance of the Chinese market, which was down 3%. At the European sector level, the energy sector leads the way (up 14.1%), followed by the property sector, up 7.9% and the banking sector which is up 4.1%. Cyclical consumer goods and information technology were the biggest sector losers this quarter, being down 11.5% and 10.7% respectively. So-called value stocks (up 1.8%) are outperforming growth stocks (down 6.5%).

Rates

Bond yields rose significantly in Q3. The German 10-year Bund yield rose more than 42 bps to 2.81%. The US 10-year bond yield rose 76 bps to close the quarter at 4.57%. Bond yields are returning to levels seen before the financial crisis, a sign of the change in the macro-financial regime. The US economy surprised observers with its resilience. Growth remains solid and the probability of a soft landing is increasing. The Fed raised its key rates to 5.5%. The monetary tightening cycle is expected to come to an end, but Jerome Powell (Chairman of the Federal Reserve) indicated that key rates are likely to remain high for an extended period. For its part, the ECB faces a dilemma of high inflation versus rapidly deteriorating growth prospects in the Eurozone. It has raised deposit interest rates to 4% and is now expected to leave them unchanged for a prolonged period too. The battle to bring inflation back to the 2% target will be drawn out, requiring maintaining a restrictive monetary policy.

Q4 2023

Economic activity remained robust in Q4 although decelerating in the US and disappointing in the Eurozone. Growth in most of the emerging economies slowed while at the same time remaining strong. Inflation has continued to fall in most countries. The US Federal Reserve and the European Central Bank indicated that they are coming to the end of the cycle of key rate hikes, while several central banks in the emerging economies have lowered theirs. On the markets, bond yields rose and shares fell in October, but this trend reversed in November and December so that at the end of the year bond yields were lower than at the beginning of the quarter, while stocks were clearly rising, with several indices even reaching all-time highs.

United States

Although the American economy continued to show surprising resistance to the sharp rise in interest rates, the trend was nonetheless towards a slowdown. The Q3 growth figures released in Q4 showed very sustained activity (GDP growth of 4.9% at an annualised rate according to the December review). However, the most recent job market figures have shown that they may be beginning to run out of steam, so despite still abundant job creation (close to 180,000 a month on average in Q4), the unemployment rate has stabilised at 3.7% in December, compared to 3.4% at its lowest in April. Other monthly figures, such as those for retail sales, durable goods orders and industrial production, are signalling that Q4 growth will likely be significantly weaker than Q3. On the other hand, inflation, although above the Fed's 2% target, has clearly fallen. In November, the increase over 12 months in the general price index was only 3.1%, compared to 3.7% in August, with the underlying index at 4.0%, compared to 4.3%. The Federal Reserve has not changed its key rates after increasing them in July. It indicated that it was satisfied with their current level and that the pace of lowering them in the future was still under discussion.

The figures stated in this report are historical and not necessarily indicative of future performance.

Eurozone
Economic activity has remained particularly sluggish in the Eurozone, with the rise in interest rates adding to the specific difficulties on the industrial sector. At the end of November the review of Q3 GDP figures showed a very slight fall down 0.1% for the whole region, including modest decreases in France and Germany, a negligible increase in Italy and a slightly bigger increase in Spain. This erosion is part of the quasi-stagnation seen since the beginning of the year. The figures for the start of Q4 did not show any notable improvement. The labour market, however, is still in relatively good shape, with the unemployment rate remaining at 6.5% in October, its lowest since the creation of the Eurozone. The good news came from inflation with the pace of rises in the general price index slowing, reaching 2.9% over 12 months in December (after being at 4.4% in September) and the underlying index slowed to 3.4% (previously 4.5%). The European Central Bank has not changed its key rates after increasing them in September. After its monetary policy committee meeting in December it again stated it was confident that the current level of rates would make it possible to further bring down inflation, while indicating that any discussion on possible rate cuts was premature.

Emerging Markets
China continued to be cautious in developing economic policies in Q4, against a backdrop of a very uneven recovery. Public spending on infrastructure has been ramped up but consumption has slowed and inflation has settled in negative territory. In Brazil inflation growth has continued to slow, while in India consumption was more robust than investment. As a whole, in the emerging economies, domestic demand has slowed and inflation has continued to drop off, while remaining below central banks' figures in the majority of cases. Central banks have continued lowering their rates. The Brazilian central bank went ahead with several cuts of 50 bps, whereas the Chilean central bank accelerated its pace with cuts of 75 bps. Others joined in, for example the central banks of Colombia and the Czech Republic. The US Federal Reserve's apparently more restrictive stance has reduced pressure on exchange rates, which had previously led to the Indonesian central bank to raise rates and Chile's to slow down its cuts. Finally, in Argentina, the new President Milei started his tenure with a 50% devaluation of the peso and an ambitious plan to liberalise the economy.

Equities
Stock markets fell in October, but rebounded strongly based on a cut in long-term rates. Over the quarter the MSCI World AC was up 9%. At the regional level the US (up 11.5 %) outperfomed Europe (up 5.3%). Inside the Eurozone (up 7.5%) the Netherlands (up 14.8%) and Portugal (up 10.2%) outperformed their neighbours. The rest of the member states are in the green, with France (up 5.6%) and Spain (up 6.7%) bringing up the rear. Outside the Eurozone, the Swedish market stands out at the head of the field (up 12.2%) followed by the UK market (up 1.6%) and Switzerland (up 1.3%). Japan (up +2.1%) in local currency, continues to benefit from the fall in the yen as well as the resilience of its economy. Finally, the MSCI Emerging Markets index was up 5.2% despite the underperformance of the Chinese market, which was down 5%. At the European sector level value stocks (up 3.4%) underperformed growth stock (up 7.2%). In the lead were the property sector (up 22.6%) and IT (up 18.3%), sensitive to interest rates. The energy (down 2.6%) and basic consumer goods sectors were the only ones to end the quarter in negative territory.

Rates
Interest rate markets were marked by a sharp fall in rates across the entire curve. The US 10-year rate closed the year at almost 3.8% and the German 10-year Bund at around 2%. The market also expects the Fed and the ECB to begin a round of rate cuts in March. This rapid reduction in rates is explained by: 1) a greater than expected drop in inflation in developed economies; 2) a change in the Fed's tone, which has now returned to the point where its two mandates, inflation and jobs, are significant. The Fed is reassured by the decline in inflation, the members of the FOMC are now very attentive to the impact of rising rates on growth, with the aim of avoiding an excessive slowdown in activity. The Fed therefore does not want to hold back the economy longer than is necessary; 3) economic growth that has continued to surprise on the downside in the Eurozone. However, the labour market in the Eurozone is very solid. Markets now expect inflation to return rapidly to 2% without a recession.

Q1 2024

Economic activity remained strong in the United States in Q1 2024, less so in Europe, though it improved slightly compared to the last quarter of 2023. The trend was also slightly better in emerging economies. Inflation continued to fall, albeit gradually. Both the US Federal Reserve and the European Central Bank (ECB) indicated that they would wait a little longer before lowering their rates. On the markets, bond yields bounced back while equities continued their good momentum at the end of 2023.

United States
The US economy continued to demonstrate remarkable strength, although many observers expected the key rate hikes of 2022 and 2023 to lead to recession. At the end of March, a third official estimate of Q4 2023 GDP showed growth of 3.4% at an annualised rate. Turning now to more recent data, labour market figures indicated the creation of more than 500,000 net jobs in January and February, which represents a strong and accelerating pace compared to Q4. For their part, business climate indicators for industrials signalled a slowdown in their decline over the first two months of the quarter, with the services sector still improving. Inflation continued to fall, albeit gradually. In February, the general consumer price index was 3.2% over 12 months after coming in at 3.4% in December, and the underlying index was 3.8% compared to 3.9% previously. At the start of the quarter the Federal Reserve's message sought to calm market expectations of a reduction in key rates in Q1. It indicated that the next move was highly likely to be a reduction, but it would only happen after more signs of a lasting slowdown in inflation.

Eurozone
After near stagnation throughout 2023, some faint signs of improvement appeared in Q1. Q4 GDP figures showed zero growth. They were slightly negative in Germany, slightly positive in Italy and France and more positive in Spain. However, in March, PMI indices rose to a level that indicated an expansion in activity in the services sector, with a less severe contraction than at the end of 2023 in industry. Other indicators, such as Germany's IFO business climate index, also reported a very slight improvement. Likewise, the labour market continued to resist the economic gloom as the unemployment rate remained at 6.5% in February, its lowest level since the creation of the eurozone. Inflation continued to slow, with the 12-month consumer price index dropping to 2.6% in February (from 2.9% in December) and the underlying index fell to 3.1% from 3.4%. Like the US Fed, the ECB has sought to dispel expectations of a rapid lowering of key rates. The message from its monetary policy committee meeting on 7 March was widely interpreted as a sign of a first reduction in June.

Emerging Markets
The economic upturn in China was moderate and deflationary pressures persist. The Chinese authorities have preferred to lower interest rates instead of using budgetary weapons to target the reduction of local authority debt. Since the start of the year, growth has improved in emerging countries, even though it has remained in negative territory in central and eastern Europe. Inflation fell sharply in most countries in January, but in February some upside surprises and concerns about expectations emerged. Emerging countries' currencies were extremely volatile as they waited for greater visibility on US monetary policy, equities were not spared either. Central banks, most of which had started to ease their monetary policy, once again reacted quickly by holding off rate cuts in March and/or keeping them unchanged. Obviously, the geopolitical context continues to weigh heavily on investors' sentiment, who are particularly concerned about possible repercussions on global inflation.

The figures stated in this report are historical and not necessarily indicative of future performance.

Rates
Rates remain on the high side, volatility remains strong. The German 10-year Bund yield exceeded 2.3% and that of the 10-year US bond 4.3%. There are two factors still driving markets — inflation's progress and what central bankers are saying. Markets are very confident that the ECB will lower rates in June. During its last committee meeting the ECB did indeed keep the door open for a rate reduction in June. However, Christine Lagarde has reiterated her call for patience when it comes to monetary policy. The ECB remains cautious about the pace of disinflation, particularly in the services sector, and will continue to monitor labour market development, which has shown great resilience. On the other hand, markets are less sure that the Fed will cut rates in June. The Fed is in no hurry to lower rates. It considers that underlying economic growth is more likely to bounce back and is stronger than in December. The Fed's rhetoric has not changed, despite the recent acceleration in inflation. It maintains the story that "inflation is gradually falling on a sometimes rocky path towards 2%".

Equities
Risky assets started the year in the green. Investors bought into the "soft landing" scenario, causing equities markets to rise. In addition, good quarterly corporate results supported equities markets this quarter. The knock-on effect is that global stocks have benefited — the MSCI ACWI is up 9.1%. The US increased by 10% and outperformed Europe, which was up 7.6%. Eurozone markets are doing better, up 9.9%, with the Netherlands (up 17.9%) and Italy (up 15.7%) being the main contributors. Outside the eurozone, the UK market is doing less well this quarter, only gaining 2.9%. Sticking with developed markets, the Japanese market was impressive this quarter, rising 18.3%. MSCI emerging markets index progressed (up 4.0%) driven by the outperformance of the Taiwanese market, which rose 16.9%. At the European sector level, so-called cyclical shares (up 10.4%) prevail over defensive stocks (up 2.9%). These were led by technology (up 17.9%), cyclical consumer goods (up 12.3%) and the insurance sector (up 11.9%). Utilities (-5.6%) and the property sector (-1.4%) were the main detractors this quarter. In Europe growth stocks (up 10.7%) are outperforming value stocks (up 4.4%).

Q2 2024

Economic figures showed diverging trends on both sides of the Atlantic. In the US, activity is slowing slightly from a previously vigorous dynamic and inflation has resumed its downward trend. In the Eurozone the business climate is improving after several difficult quarters and inflation has reaccelerated modestly after several months of decline. The ECB initiated a first rate reduction on 6 June, while the Fed did not make any precise statement about the date of its first move. On the markets, bonds performed negatively and remain volatile, particularly in Europe, whereas stocks continue to rise.

United States
After several quarters of good resilience, the US economy has started to show signs of weakness in the second quarter. Although US figures continued to be a testament to powerful activity (the ISM manufacturing index returned to positive territory for the first time since November 2022 and retail sales were up), the first signs of weakness came with Q1 GDP growth being below expectations. US indicators released in May, for the most part, signalled a moderate slowdown in activity, with the ISM indices returning to a slight contraction in industry. This trend was confirmed in June. The message was different in services, where prospects improved. The labour market was also contradictory with good progress in jobs creation but the unemployment rate moved up to 4%. The downturn in prospects for consumption was, however, confirmed with disappointing retail sales which foreshadowed weak growth in Q2.

Inflation's downward trend seemed to halt at the start of the quarter. It was finally validated with PCE inflation (the Federal Reserve's preferred measure) at an annualised rate of 2.6%. However, inflationary pressures were confined to services. In this context the Federal Reserve refrained from announcing any timetable for rate cuts, indicating it first needs more signs of disinflation. Fed officials raised their inflation forecasts for 2024 slightly and shifted the sequence of key rate cuts over time without changing the total value of -250 bps by the end of 2026. At the end of June, several Fed governors seemed reluctant to support rate cuts before the end of the year.

Europe
The improvement in the European economic situation was the nice surprise of the second quarter. Although still weak in absolute terms, figures from the Eurozone clearly surprised on the upside in April from very pessimistic expectations. Thus the major indicators of the economic climate (Sentix, ZEW and PMI) overall signalled a slight improvement in activity, despite a situation that remains eroded in the manufacturing sector. June confirmed a slight recovery in economies with notable signs of improvement, which augurs moderate expansion in the second quarter.

Even if the overall inflation trend in the Eurozone is downward, it is resisting in service activities, which are its main driver. Inflation statistics for May indicate an uptick to 2.6% year-on-year, compared to 2.4% in April, falling again to 2.5% in June at an annualised rate. This is mainly due to inflation in services which is only expected to decrease gradually. The annual base inflation rate, which excludes volatile food and energy prices, reached 2.7% in April and 2.9% in June, above market expectations. Among the major economies, inflation (harmonised at EU level) fell in Germany (2.5%), France (2.5%) and Spain (3.5%), while it rose in Italy (0.9%).

Despite the backdrop of volatile inflation and resumption of economic activity, the ECB reduced its headline rates on 6 June by 25 basis points for the first time in almost five years, cutting the deposit rate to 3.75% from 4% in line with market expectations. Christine Lagarde, however, did not comment on future rate cuts. The temporary divergence between the Fed and the ECB had a limited effect on the euro which fell from 1.09 to 1.07 against the US dollar.
Although inflation is back down at 2% in the United Kingdom, the Bank of England maintained its rates at 5.25% before the UK elections on 4 June, which revealed the uncertainty about how it would perform in the short term.

Asia
In Japan inflation data for May was lower than consensus expectation and growth statistics for Q1 have been lowered. Inflation (excluding energy and fresh produce) was at 2.1% year-on-year, lower than the 2.2% forecast. Inflation's return to the Bank of Japan's (BoJ) target was slightly quicker than forecast. The market is logically anticipating the BoJ should maintain its short-term interest rates, leading to a further fall in the yen (the USD/JPY broke 160 at the end of the quarter).

China remains in the grip of a property market that is failing to stabilise, with a continued decline in volumes and prices. The latest measures announced by the Chinese government suggest a turnaround to this situation which has been weighing on consumption and employment for several quarters. Moving from low-impact technical measures to more engaging policies towards the construction sector, the Chinese authorities are looking to confirm their desire to achieve the 5% growth target this year. In a tense geopolitical context, China is accused by its trading partners of unfair competition in many sectors, leading to an increase in US customs tariffs and a potentially similar move by the EU. But the most significant risk remains weak interior demand, confirmed by the June PMI indicators.

Emerging Markets
Although inflation generally seems to be under control in emerging economies, all eyes are on the Federal Reserve, which is expected to cut rates only in the second half of 2024, and which in turn determines moves of the central banks of emerging economies. Malaysia, Mexico, the South Africa Reserve Bank (SARB) the National Bank of Poland (NB) and the Turkish Central Bank (TCMB) are among the central banks that have kept their rates unchanged, while the Czech National Bank (CNB) and the National Bank of Hungary (NBH) have reduced their rates by 50 basis points, with the Central Bank of Bulgaria (BCB) and the Central Bank of Peru (BCRP) lowering theirs by 25 bps. The People's Bank of China, is still constrained by its preference for currency stability and continues to keep rates constant.

The figures stated in this report are historical and not necessarily indicative of future performance.

On 4 June, India announced the results of its national elections. The national democratic alliance, led by the Bharatiya Janta Party (BJP) was re-elected with a very narrow majority. Even so, Modi obtained the support of his allies in the coalition which allowed him to form a government for the third consecutive time. After the good performance of Indian stocks over several quarters, investors will be sensitive to the progress of ambitious economic reforms and public finances.

Rates

Bond markets remain volatile, following a halt to the decline in inflation in the advanced economies, the absence of a landing for the US economy but an acceleration in European economies. The US 10-year bond yield is approaching 4.5% while 2-year rates remain close to 5%. In Europe the German 10-year bond yield has exceeded 2.6% and 3% for the OAT. Rate spreads among the main European sovereign issuers have remained stable, but we note an unfavourable move for France after its rating was downgraded by Standard & Poor's and the announcement of the dissolution of the national assembly following the defeat of the presidential movement in the European elections.

Since the start of the year, with US inflation proving more stubborn than forecast, the US Federal Reserve's rhetoric is now "not to be in a hurry to lower rates". This has been a source of volatility on the bond markets. In contrast, inflation in Europe now appears to be more or less under control and the ECB has initiated a first rate cut. Credit markets are developing positively thanks to resilient economic activity, strong balance sheets and the expectation of rate cuts by the central banks.

Equities

Despite a temporary correction in April following the release of US inflation data which many feared would lead to a new hike in the Fed rates, equities markets have rebounded through the quarter thanks to the publication of reassuring Q1 results.

The MSCI World index rose 2.6% with extremely contrasting regional performances. The US market was up 4.1%, significantly outperforming Europe (up 1.65%) and Japan (down 2.5%) in dollar terms. The French market was impacted by the national political context, dropping around 6% in June.

The S&P500 (TR) index was up 4.3% in the second quarter and 3.6% in June alone. The quarter did not start well, with a fallback in April as a series higher-than-expected inflation reports pushed interest rates higher and fuelled concerns of a new rate hike by the Fed. Concerns about inflation were later dispelled and the stock market reached new highs.

We note a change in the dynamics of equity markets with less concentration in very large US stocks (magnificent 7) and an outperformance in Europe in certain phases, investors looking for sectors or regions less expensive than the United States. However, the political uncertainty in France followed by the dissolution of the national assembly led to non-European investors retreating. But the big surprise must be the rebound in the Chinese market (up 5.4%) following government announcements of greater support for the property sector and despite profit-taking in June. Despite the rise in long-term rates, growth stocks continue to significantly outperform the value segment, even though we note renewed interest in discounted sectors and the rebound of European banking stocks in the first part of the quarter.

Luxembourg, 19 July 2024

1 INTRODUCTION

Amundi Funds (the "Fund") is organised as a "Société d'Investissement à Capital Variable" ("SICAV") under the laws of the Grand Duchy of Luxembourg. The Fund, initially Groupe Indosuez Funds FCP, an unincorporated mutual investment fund ("Fonds Commun de Placement") created on 18 July 1985, was transformed, in accordance with Article 110 (2) of the law of 30 March 1988 on Undertakings for Collective Investment, and renamed GIF SICAV II on 15 March 1999. The deed of transformation and the Articles of Incorporation (the "Articles") were published in the Mémorial, Recueil des Sociétés et Associations on 28 April 1999. The name of the Fund was then changed to GIF SICAV on 1st December 1999, to Crédit Agricole Funds on 8 December 2000 and to CAAM Funds on 1st July 2007. As at 2 March 2010, in accordance with the decision taken by the shareholders in the framework of the Extraordinary General Meeting held on 23 November 2009 and with the decision of the Board of Directors taken on 23 December 2009, CAAM Funds was renamed Amundi Funds.

The amendments to the Articles have been published in the Mémorial, Recueil des Sociétés et Associations respectively on 14 January 2000, on 17 January 2001, and on 13 June 2007 for the first three name changes and on 3 April 2010 for the last one. A latest amendment to the Articles has been made on 14 March 2012 and has been published in the Mémorial, Recueil des Sociétés et Associations - C, number 943 and dated 12 April 2012. The Fund is subject to Part I of the amended law of 17 December 2010 on Undertakings for Collective Investment (the "2010 law").

The following Sub-Funds have been launched during the period:
Amundi Funds Climate Transition Global Equity on 13 September 2023
Amundi Funds Global Short Term Bond on 29 November 2023
Amundi Funds Emerging Markets Equity Focus ex China on 05 December 2023
Amundi Funds Asia Income ESG Bond on 06 December 2023
Amundi Funds European Equity on 25 April 2024
Amundi Funds Asia Multi-Asset Target Income on 23 May 2024
Amundi Funds Europe ex UK Equity on 25 June 2024.

The following Sub-Funds have been renamed on 15 March 2024:
Amundi Funds European Equity Green Impact into Amundi Funds European Equity Green Technology
Amundi Funds European Equity Sustainable Income into Amundi Funds European Equity Income ESG
Amundi Funds Global Equity Sustainable Income into Amundi Funds Global Equity Income ESG

The following Sub-Funds have been liquidated during the year:
Amundi Funds Global Macro Bonds & Currencies on 12 March 2024
Amundi Funds European Equity Risk Parity on 07 June 2024

As per Depositary confirmation, the following balances are present as at 30 June 2024 for these liquidated Sub-Funds:
- Amundi Funds Global Macro Bonds & Currencies: EUR 47,756.14
- Amundi Funds European Equity Risk Parity: EUR 83,293.70
- Amundi Funds Equity Korea: USD 1,744,213.33

On 18 October 2024, the closure of the liquidation of Amundi Funds - Equity Korea was made by reimbursing the Korean Tax (1,744,213.33 USD) to the existing shareholders at liquidation date.

The following Sub-Funds have been merged during the period:
Amundi S.F. European Equity Optimal Volatility into Amundi Funds Global Equity ESG Improvers on 13 October 2023
Amundi Funds Pioneer US Equity Mid Cap into Amundi Funds Pioneer US Equity ESG Improvers on 03 November 2023

Considering the cumulated relevant portion of Russian and Ukrainian securities in portfolio and following decision of the Board of Directors of the SICAV:
- Amundi Funds Russian Equity: the NAV calculations has been suspended on 28 February 2022 and the last available official NAV is dated 25 February 2022. After that date, no further subscriptions or redemptions have been accepted for this Sub-Fund.
- Amundi Funds Emerging Europe Middle East and Africa: the segregated class (ISIN LU2600584523) created on 11 April 2023, where all the illiquid Russian asset and liabilities have been transferred, is still existing.
The class is still under liquidation and subscriptions and redemptions are still not accepted. All the related fees are still waived or borne by the Management Company. No advance on liquidation proceeds have been anticipated to the shareholders.

In reference to the prospectus dated April 2024 and the supplement of prospectus dated May 2024, as at 30 June 2024, the Fund consisted of 114 Sub-Funds in activity, each investing in a specific market or group of markets.
Climate Transition Global Equity, Euroland Equity, European Equity ESG Improvers, Euroland Equity Small Cap, European Equity, Europe ex UK Equity, European Equity Green Technology, European Equity Value, European Equity Income ESG, European Equity Small Cap, Equity Japan Target, Global Ecology ESG, Global Equity ESG Improvers, Net Zero Ambition Global Equity, Global Equity Income ESG, Japan Equity Engagement, Japan Equity Value, Montpensier Great European Models SRI, Montpensier M Climate Solutions, Global Equity, US Equity Dividend Growth, US Equity ESG Improvers, US Equity Fundamental Growth, US Equity Research, US Equity Research Value, Polen Capital Global Growth, Net Zero Ambition Top European Players, US Pioneer Fund, Asia Equity Focus, China A·Shares, China Equity, Emerging Europe Middle East and Africa, Emerging Markets Equity Focus, Emerging Markets Equity Focus ex China, Emerging Markets Equity ESG Improvers, Emerging World Equity, Latin America Equity, Equity MENA, Net Zero Ambition Emerging Markets Equity, New Silk Road, Russian Equity, SBI FM India Equity, Euroland Equity Dynamic Multi Factors, Euroland Equity Risk Parity, European Equity Conservative, European Equity Dynamic Multi Factors, European Equity Risk Parity, Global

For a complete list of Sub-Funds and share classes currently available, go to the website www.amundi.lu/amundi-funds.

[1] For purposes of minimum initial investment, we aggregate the investments of a given investor (or group of entities fully owned by the same parent company) across the entire SICAV (all share classes and all Sub-Funds). Minimums apply in USD or equivalent amount in any other currency.
[2] For Volatility Euro and Volatility World, may be up to 2.00% higher if the board determines that new investments may adversely affect the interests of existing shareholders.
[3] In I2 and A2 share classes, Board approval is not required.
[4] For A4 share classes, switch is only possible between A4 share classes of another Sub-Fund of the UCITS.

2 PRINCIPAL ACCOUNTING CONVENTIONS

PRESENTATION OF THE FINANCIAL STATEMENTS

The Fund's financial statements were prepared in accordance with the legal and regulatory provisions in force in Luxembourg concerning undertakings for collective investment.

The financial statements are presented on the basis of the latest Net Asset Value ("NAV") calculated during the financial period. In accordance with the prospectus dated April 2024 and the supplement of prospectus dated May 2024, the NAVs were calculated using the latest market values and exchange rates known at the time of the calculation meaning:

- For all Sub-Funds (except for Amundi Funds Equity MENA): official NAV dated 28 June 2024;
- For Amundi Funds Equity MENA: official NAV dated 27 June 2024.

In the annual report as at 30 June 2024, the Sub-Funds merged or liquidated during this year are shown separately in the Statement of Operations and Changes in Net Assets and are included in the combined figures.

The financial statements of the Fund and each of its Sub-Funds have been prepared on a going concern basis of accounting, except for the Sub-Fund Global Macro Bonds & Currencies Low Vol.

The objective of Amundi Funds Protect 90 is to provide a participation in financial markets evolution while also providing permanent partial protection of your investment over any given 3-year period. Specifically, the Sub-Fund is designed to ensure that its share price does not fall below 90% of the highest net asset value reached since the last business day of the preceding month of April, as per prospectus.

- **Cross Sub-Funds investments** - As at 30 June 2024, the value of the investments made by Sub-Funds in other Sub-Funds of the SICAV amounts to EUR 809,545,087.52 corresponding to 1.06% of the total net asset value. Therefore, the total combined NAV at the year end without those cross investments would amount to EUR 75,735,141,619.48.
- **Securities portfolio** - Transferable securities listed on a Stock Exchange or on a regulated market are valued at their last known price. When these prices are not representative or when securities are not listed, they are valued at their reasonably probable realisation value, determined with care and in good faith by the Board of Directors.
- **Conversion of items expressed in foreign currencies** - The Fund's financial statements are expressed in Euro (EUR). Net assets of each Sub-Fund expressed in foreign currencies are therefore converted and combined in EUR at the exchange rate in force at the close of the financial year.
  Transactions and acquisition costs for portfolio securities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund concerned at the exchange rate in force on the date of transaction or acquisition, as appropriate. Valuation values for securities in the portfolio and of other assets and liabilities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund at the exchange rate in force at the end of the financial year. Currency differences resulting from these conversions are recorded under the caption "Reevaluation of consolidated Net Assets" in the Statement of Operations and Changes in Net Assets.
- **Return on investments** - Dividends are entered as yields on the date when they are declared and in so far as the appropriate information can be obtained by the Fund. Interest is accrued on a daily basis.
- **Distribution of costs and expenses** - Each Sub-Fund is charged with costs or expenses specifically attributable to it. Costs and expenses not attributable to a specific Sub-Fund are distributed between the Sub-Funds on an equitable basis, in proportion to their respective Net Assets.
- **Repurchase agreements** - Repurchase agreements (Repos) are equivalent to borrowings guaranteed by underlying assets presented in the securities portfolio of the Sub-Fund which remains exposed to market risk. Reverse Repurchase agreements (Reverse Repos) are similar to guaranteed loans. In this case, the Sub-Fund is not subject to the risk of depreciation in the value of the underlying assets. Repos and Reverse Repos are regarded as borrowings and loans, respectively, of the sum of liquid assets received and/or paid.
- **Futures contracts** - Unexpired futures contracts are valued at their last known price on the date of valuation or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Futures-style options contracts -** Futures-style options contracts are valued at the quoted price available on an official stock exchange. Initial margin deposits are paid in cash upon entering into the contract. Subsequent positive or negative cash-flows, referred to as variation margins, are paid or received by the Sub-Fund periodically and are based on changes in the market value of future-style options contracts. When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction. Net unrealised appreciations or depreciations on futures-style options contracts are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures-style options contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Forward foreign exchange contracts** - Unexpired forward foreign exchange contracts are valued at the exchange rates applicable on the valuation date or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on forward foreign exchange contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Valuation of options and swaptions** - Options officially listed on a stock market or any other regulated market, operating in a regular manner, recognised and open to the public, are valued on the basis of their closing prices on the valuation day or, in the absence of such prices, on the basis of the last-known prices available. OTC options including swaptions are marked-to-market based on the elements laid down in their contracts. If the last known prices for listed options or the calculated price for OTC options are not representative, the valuation will be based on the potential realisation value estimated by the Board of Directors of the SICAV with prudence and in good faith. Net realised and net change in unrealised gain/(loss) on OTC options and swaptions are recorded in the Statement of Operations and Changes in Net Assets.
- **Swaps** - The Fund is authorised to enter into variance swaps, credit default swaps, total return swaps, inflation swaps, asset swaps, interest rate swaps or currency swaps. Those swaps are recorded at market value based on the valuation elements laid down in the contracts. The unrealised net gain is included in the item "Unrealised net appreciation on swaps and CFD" in the Statement of Net Assets and the unrealised net loss is included in the item "Unrealised net depreciation on swaps and CFD" in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on swaps are recorded in the Statement of Operations and Changes in Net Assets.
- **Money market instruments** - The money market is a financial instrument with high liquidity and very short maturities. It is used by participants as a means for borrowing and lending in the short term, with maturities that usually range from overnight to just under a year. For the money market instruments, the accretion (difference between cost and amortised value), is reported under "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements" in the Statement of Operations and Changes in Net Assets for securities held at year end. If the instruments have been sold or reimbursed, this result is considered as "Net realised profit/(loss) on securities sold" in the Statement of Operations and Changes in Net Assets.
- **To Be Announced securities (TBAs)** - TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of purchase, the principal value has not been finalised. TBA positions are disclosed in the Securities Portfolio. The purchase of this type of security has not been settled and as a consequence, the amount corresponding

to the payable due when the transaction is settled, is disclosed under “Brokers payable” in the Statement of Net Assets. The realised profits/(losses) on TBAs and changes in unrealised appreciation/depreciation are disclosed in the Statement of Operations and Changes in Net Assets respectively under the headings “Net realised profit/(loss) on securities sold” and “Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements”. MBS / ABS risk Mortgage-backed and asset-backed securities (MBSs and ABSs) typically carry prepayment and extension risk and can carry above-average liquidity, credit and interest rate risks.

- **Net realised profit/(loss) on securities sold** - The “Net realised profit/(loss) on securities sold” figure of the Statement of Operations and Changes in Net Assets reflects the difference between the cost and proceeds from securities sold, including the market as well as the currency impacts.
- **Transaction costs** - The transaction costs include broker fees and fees charged by the custodian for securities and derivatives transactions. The transaction fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption “Broker and transaction fees“ in Statement of Operations and Changes in Net Assets. Refer to note 23 which describes the reception and transmission of orders fees.
- **Contracts for difference (CFD)** - At each valuation date, the difference in price between the opening price and the current market price of the underlying security or index to the CFD is recorded as the market value (unrealised gain or loss) of the contract; when the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a realised gain or loss under captions Net realised profit/(loss) on swaps and CFD in Statement of Operations and Changes in Net Assets. Initial margin deposits may be made in cash upon entering in CFD. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open CFD contracts.
- **Securities lending** - In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender.The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

3 EXCHANGE RATES USED AS OF 30 JUNE 2024

The exchange rates used for the combined figures are the following:

1 JPY	=	0.005800 EUR
1 USD	=	0.933053 EUR

4 MANAGEMENT FEES, ADMINISTRATION FEES AND DISTRIBUTION FEES

Fee structure - The Administration fee is a fee expressed as a percentage of the NAV of the Sub-Funds and classes of shares, including all the administrative expenses of the Fund.
Such fee includes the remuneration of the Administrative Agent, Domiciliary Agent, Transfer Agent and Registrar Agent for their services rendered to the Fund, the remuneration of the Custodian for its services rendered to the Fund as well as all other administrative expenses incurred in the operation of the Fund including but not limited to:

- the fees of auditors and legal advisers of the Fund (including costs associated with compliance with legal and regulatory requirements);
- the cost of translation, printing and distribution to investors of the annual and semi-annual reports, of the prospectus of the Fund, of the Key Information Document of each class of shares and of any supplement thereto as well as of any notice sent to the Investors’ attention;
- any costs related to the information of the shareholders including costs related to the publication of prices of shares in the financial press, the production of information material for the subscribers and distributors;
- any fees and expenses involved in registering and maintaining the registration of the Fund with any governmental agency or stock exchange and to comply with any regulatory requirements and the reimbursement of such fees and expenses incurred by any local representative;
- the fees of any local representative/correspondent, of which the services are required pursuant to the applicable law;
- the costs related to extraordinary measures, in particular any expertise or trial aiming at the protection of the shareholders’ interests;
- the costs related to the translation, distribution and publication of any notice to the shareholders.

The Administration fee is paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company and is calculated each day for each Sub-Fund and each class of shares.
The Management fees, expressed in percentages of the NAV, are paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company and calculated each day for each Sub-Fund on the basis of the daily NAV of each class of shares.
Amundi Luxembourg S.A. is responsible for paying commissions to Investment Managers.
In addition to the management fees paid by the Fund to Amundi Luxembourg S.A., the Sub-Funds investing part of their assets in other UCI's are also subject to the management fees charged to those Sub-Funds, except for cross Sub-Funds investments.
The Distribution fees are calculated and accrued on each Dealing Day at the below rates per annum and are paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company. Amundi Luxembourg S.A. is responsible for the payment of fees to Distributors.
The Management Company can further decide to pay remuneration to Distributors out of its own fees.
The Management fees, Administration fees and Distribution fees, expressed as a percentage of the NAV, applicable at 30 June 2024 are the maximum rates set out on the website www.amundi.lu/Amundi-Funds, except for the Sub-Funds Amundi Funds Cash EUR and Amundi Funds Cash USD, for which the below rates per annum are applied:

5 PERFORMANCE FEES

The performance fee is calculated separately for each Class of Shares. It shall be accrued daily, deducted and paid annually for each Class of Shares. The performance fee is calculated by comparing the NAV of the Sub-Fund relevant Class of Shares and the reference asset.
The mechanism applied is further detailed on the website www.amundi.lu/Amundi-Funds
The Sub-Funds and the Classes of Shares subject to a performance fee are listed on the website www.amundi.lu/Amundi-Funds.
For all the classes authorized in Hong Kong please note that no performance fees are applied.

6 TAXATION OF THE FUND - TAXE D'ABONNEMENT

The Fund is further liable in Luxembourg to a tax of 0.05% per annum in respect of the Equity Sub-Funds, Bond Sub-Funds, Multi Asset Sub-Funds, Protected Sub-Funds and Absolute Return Sub-Funds except on investments by these Sub-Funds in other undertakings for collective investment established in Luxembourg and already subject to the *taxe d'abonnement* as per law (for which no tax is applied) and of 0.01% per annum in respect of the Cash Sub-Funds, the H classes Category, the I classes Category, the J classes Category, the M classes Category the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category of all the Sub-Funds ("Taxe d'Abonnement"), such tax being payable quarterly on the basis of the NAV of the Fund at the end of the relevant calendar quarter.
The benefit of the 0.01% per annum Taxe d'Abonnement is available to those Shareholders admitted in the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category on the basis of the Luxembourg legal, regulatory and tax provisions as these are known to the Fund at the time of admission of an Investor in such class of shares.
However, no guarantee can be given for the past and for the future and such assessment is subject to interpretations on the status of an eligible Investor in the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category by any competent authorities as will exist from time to time. Any such reclassification made by an authority as to the status of an Investor may submit the entire class of shares to a Taxe d'Abonnement rate of 0.05% per annum.

7 OTHER INCOME

Amounts of other income in the Statement of Operations and Changes in Net Assets include mainly revenues from securities lending and recovery of provisions on performance fees.

8 OTHER EXPENSES

Balances for other expenses in the Statement of Operations and Changes in Net Assets mainly include other taxes, director fees and costs from securities lending.
Amounts of other expenses in the Statements of Operations and Changes in Net Assets in the Sub-Funds Asia Equity Focus, Emerging Markets Equity Focus, Emerging Markets Equity ESG Improvers, Emerging World Equity, New Silk Road, SBI FM India Equity, Global Multi-Asset and Pioneer Flexible Opportunities mainly include Indian Tax.
As from 14/05/2024, the process for indian tax settlement changed and the taxes paid are now included in the realised caption in the Statement of Operations and Changes in Net Assets, except for the Sub-fund SBI FM India Equity.

9 REVERSE REPURCHASE AGREEMENTS

During the financial year ending 30 June 2024, certain Sub-Funds entered into reverse repurchase contracts, the amount of which being disclosed below in the Sub-Funds currency, by which they lend a certain amount to financial institutions, guaranteed by collateral. On 30 June 2024, loans granted in accordance with these agreements were guaranteed by the following underlying assets.
Counterparty's countries are listed following the ISO 3166-1 standard.
The amount of Investment Grade is referred to bonds rated at least BBB- by S&P, Baa3 by Moody's and/or BBB- (by Fitch).
Please refer to the note 17 for detailed collateral information.
